In my eyes, the environment is the key to a successful project. I support Rosemont Copper because their mine is environmentally friendly and will allow Arizona to mine from a large copper reserve. This 21<sup>st</sup> Century mine be the leader in environmentally friendly mining – especially when it comes to water protection and land reclamation.

This is a great plan that the EPA should support, especially because it sets an example for other mines to follow. The work that you have so far is greatly appreciated, and I urge you to help move the project along.
